HOW TO NAVIGATE THIS SPARE PART LIST

When placing an order for a replacement part Arcoma need to know the spare part number. The purpose of this list is to make it easier to find the spare part number. You can do this in two ways:

1. Use the search function of this PDF and type the spare part number. You can also search for any part numbers found on the actual part to be replaced – this is the numbers stated below in the “Info” column.
2. Click your way through to the part location.
Note that the pictures are “clickable” and will guide you to the closest page:

Click the subsystem where the part is located:

Click on the area where part is located:

Cross reference the numbers stated on part with the “Info” column:
