

EXTENDED WALL STAND

ARCOMA PRECISION i5

EXTENDED WALLSTAND

Extended length between the column and the Wall stand detector. Allows easier examinations of the patients on a stretcher.

> *new option*

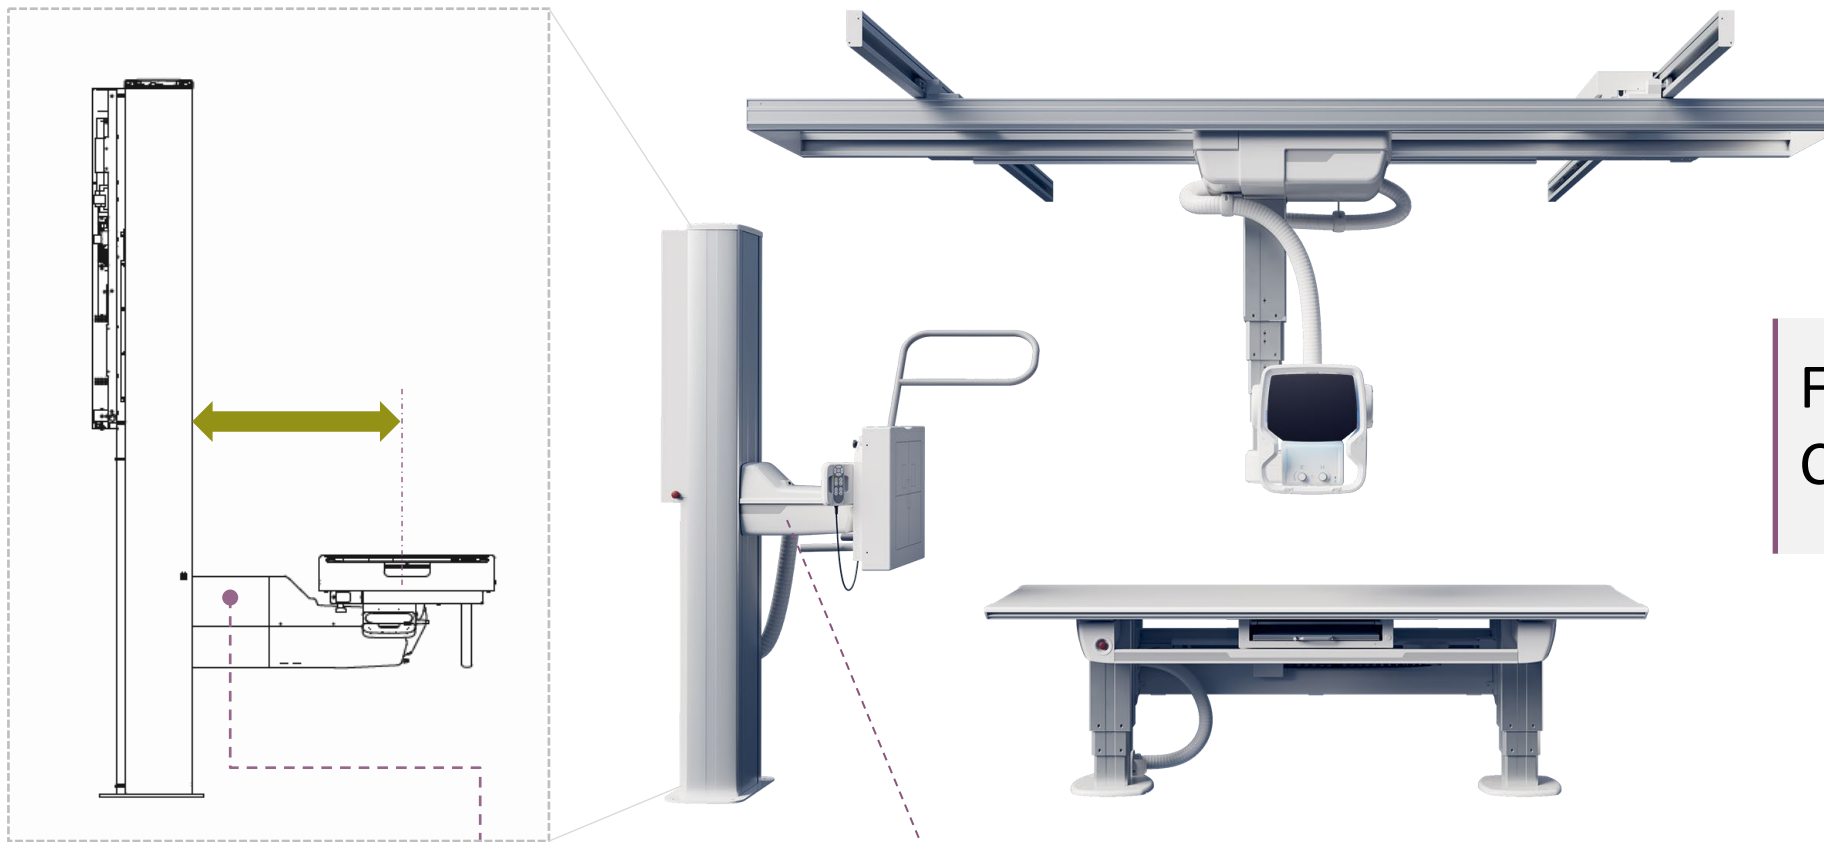

This new option improves the workflow, makes the examination more efficient and much more comfortable for the patient.

The extended length between the column and the wall stand detector allows easier examinations of the patients on a stretcher. Instead of transferring a Patient to the examination table the Patient can remain on the stretcher.

EXTENDED WALL STAND

EXTENDED LENGTH

STANDARD LENGTH

Flexible workflow
Convenient for patient

EXTENDED WALLSTAND

ARCOMA PRECISION i5

BRIEF DESCRIPTION

The extended Wall stand will give a longer distance between WS column and detector center.

CLINICAL VALUE

The longer distance will give access to position a stretcher above a titled WS detector. Instead of transferring a Patient to the examination table the Patient can remain on the stretcher.
